

Ultramarine

The *Ultramarine* is set to be an unrivalled operational base for polar expeditions. With a pioneering mix of advanced sustainability features, it has reduced its environmental impact to an extent unseen for a polar vessel of its size.

Equipped with two twin-engine helicopters, passengers can gain breath-taking aerial views of polar landscapes. Activity options onboard include newly developed and exclusive heli-hiking, heli-landing, flightseeing, alpine kayaking, Greenland camping, mountain biking and ice sheet experience. Other activities that can be enjoyed (for an additional supplement) include camping, sea kayaking, stand-up paddle-boarding, paddle excursions, cross country skiing and mountaineering.

The *Ultramarine* offers a wide selection of adventure activities to guests, spacious suites and a substantial amount of viewing areas and public spaces. It boasts a unique zodiac hanger design with 20 quick-deploy Zodiacs accessible from two Ready Rooms, facilitating more efficient operations for activities.

The lecture theatre features high-definition, large screen projectors, real-time translation services, while the enhanced connectivity ensures that passengers get the most from their polar expedition, regardless of their native language.

Among some of the public amenities onboard, include 2 dining areas, 4 bars, a panorama lounge, lecture theatre, library, polar boutique, spa and fitness centre, Oceanview sauna, walkaround deck and bridge.
